A pictorial catalogue of the shallow water Brachiopoda of Madeira.

Peter Wirtz (peterwirtz2004@yahoo.com)

There is only one shallow water Brachiopod at Madeira, very common in caves and other dark places.

Megathiris detruncata (Gmelin, 1791)

Main reference:

Logan, A. *et al.* (2009) New record of *Novocrania* (Brachiopoda, Craniida) from Madeira, with notes on Recent brachiopod occurrences in the Macaronesian archipelagos.
